PROJECTS

IoT smart light blinking system , February 2026 - April 2026

- This project is mainly built using components like an Arduino UNO, NodeMCU ESP8266, or ESP32, along with an LED bulb/light sensor. The microcontroller connects to Wi-Fi and allows users to monitor or control the light from anywhere through the internet.

Portfolio Website Project , January 2026 - February 2026

- Portfolio Website — HTML5, CSS3, JavaScript, Netlify |
- Designed and deployed a fully responsive personal portfolio to showcase skills and projects.
- Implemented smooth UI interactions and ensured mobile-first responsive design.

Job portal website project , November 2025 - December 2025

- Job Portal Website Project

Tech Stack: HTML, CSS, JavaScript, Bootstrap

Designed and developed a responsive Job Portal Website for job seekers and recruiters.
Created user-friendly pages for job listings, application forms, login/signup, and company profiles.
Implemented search and filter functionality to help users find jobs easily.
Focused on clean UI/UX design and mobile-friendly layout for better user experience.
Added interactive features using JavaScript to improve website functionality.
Demonstrated skills in front-end web development, problem-solving, and responsive design.
